NAME
Tallinn AMM/SAM Launch Complex; Changes and Additions, [REDACTED]

COUNTRY GEO COORDINATES
USSR 59-24-25N 24-19-30E [REDACTED]

25X1D

25X1D

The complex is observed on clear, non-stereo, [REDACTED] photography, providing the first usable coverage since [REDACTED].

Significant changes and/or additions since [REDACTED] include: construction progress within the revetted launch positions of Launch Sites A, B, C, and D; a new structure under construction within the largest revetted area west of the launch area main road; 2 new, generally rectangular, graded areas west of the main road; 2 new small buildings in the Support Area and construction progress on 2 buildings previously reported; an expanded apron and a possible new rectangular structure at the eastern end of the Support Area; a new ground scar extending SW from the Support Area. Surfacing appears to have been applied to portions of the revetment walls of the centrally located position at the Electronic Site.

Small photographic scale and non-stereo photography preclude detailed analysis and determination of relative construction status of the launch positions.
